

# IMS Montessori Chinese Program

BUILDING A LOVE FOR CHINESE LEARNING

Designed for young children aged 3.8-8, our Montessori Chinese Program combines the Montessori philosophy with the richness of Chinese language and culture. Our experienced teachers use hands-on, immersive activities to teach Chinese phonetics, vocabulary, and characters in a way that is engaging and effective. With three different levels and availability in both Cantonese and Mandarin, our program is designed to meet the needs of children at different stages of language development.

## How we differ?

### *Mixed Age Group*

Age does not dictate a child's language developmental level. In a mixed age group setting, beginners can learn from more advanced kids while those who are more advanced get the reward of being a mentor.

### *Montessori Tools*

Using Montessori materials to teach Chinese is an innovative and effective way to engage children in language learning. The Montessori approach emphasizes hands-on, experiential learning, and this philosophy can be applied to Chinese language learning by using materials such as sandpaper characters, three-part cards, and pin-poking activities.

### *Indoor Gym*

We offer gym time in Chinese to help children have fun while learning Chinese. This interactive approach to language learning helps children develop strong language skills that they can use in real-life situations.
